NUMBER OF COMBINATIONS LEADING TO A PRODUCT Description Problem Statement:	3CDOAA?
Froblem Statement.	300
You are given an array arr and a product m. Your task is to find the number of possible unique triplets whose product of elements is m. Input Format:	a Pr
Input Format:	JAA BERT
The first line contains the integer, n The second line contains appearance of the error of	
 The first line contains the integer, n The second line contains space seperated integers of the array, arr The third line contains the product m. 	CDC
The input will be read from the STDIN by the candidate	3R13c116
Output Format: The output consists of a single integer, i.e. the count of unique triplets having product m.	
The output consists of a single integer, i.e. the count of unique triplets having product m.	3CDOAA 3
The output will be matched to the candidate's output printed on the STDOUT	300
Example: Input:	_0
Input:	JAA 3BRI
7	300
5 3 20 10 1 4 2 60	20
60	
Output:	Birch
3 3	, Des
Explanation:	ESS/A
Product m:60	,~
Possible triplets for product m: (5,4,3),(20,3,1), (10,3,2)	
The count of unique triplets is 3.	A SARA
